

## A "MAZE"ING BIGHORNS

A thirsty bighorn sheep is trying to reach a water hole at the bottom of Oak Creek Canyon, but the trail down the rock face to the waterhole is not an easy one. Storm clouds on the horizon threaten to bring a snow storm which could make the trail very slippery and dangerous. A hungry mountain lion lurks in the bushes and a burro stands near the waterhole refusing to share any of the water with others.

Can you help the bighorn find its way? What would happen if the bighorn were to meet any of these obstacles as it descended the trail?
